ABOUT ME

Experienced Game Developer with nearly 4 years in Unity, Unreal, C#, C++, Graphics Programming and Network Programming. Led multiple teams on projects at university events, game jams and such. Strong interest in creating, testing, and refining engaging gameplay experiences.

WORK EXPERIENCE

Game Programmer Intern

Dec 2023 - Feb 2024

Electrum Interactive

- Developed 3+ interactive games teaching C programming concepts, enhancing learning for beginners.
- Implemented gameplay mechanics, providing feedback to the designers.
- Optimized game performance, improving runtime efficiency.

PROJECTS

Cloud Jump (Research Project)

May 2026 - Aug 2026

- Designed and developed a 3D platformer in Unreal Engine investigating how dynamic environmental mechanics influence traversal and player behaviour.
- Created interactive cloud mechanics involving movement, bouncing, height manipulation, and platform breakage.
- Conducted a comparative user study using gameplay telemetry and questionnaire data to evaluate static versus dynamic platforming.

Nyctophobia

Jan 2026 - April 2026

- Led the programming team in developing a task-driven horror experience.
- Designed modular systems for timed events, dynamic objectives, and interactive tasks.
- Built the core gameplay architecture, enabling other programmers to implement additional systems efficiently.

Rockstar ModJam

Dec 2025 - Feb 2026

- Rapidly learned Lua and the GTA V modding framework to develop two gameplay mods.
- Implemented unique player mechanics within an unfamiliar existing codebase and framework.
- Performed QA testing for other teams, identifying bugs and providing actionable gameplay feedback.

EDUCATION

Bachelor of Technology in Computer Science (Gaming Technology)

2021 - 2025

S.R.M University, Chennai

Msc Computer Games Technology

2025 - 2026

Abertay University, Dundee

SKILLS

- **Languages:** C++, C#, Lua
- **Engines:** Unity, Unreal Engine
- **Development:** Gameplay Systems, Event-Driven Systems, Debugging, Performance Optimization
- **Design & QA:** Gameplay Prototyping, Playtesting, Bug Reporting, Player Feedback Analysis
- **Tools:** Git, Visual Studio
